Transnational Histories of Public Health in Southeast Asia,
1914 - 2014: A Bibliography (Version 3)
东南亚医学史资料索引（1914年 - 2014年）

by Neesha Harnam, Kirsty Walker and Alastair Su (苏源豪)

June 16, 2011

Originally prepared for the meeting on Transnational Histories of Public Health in Southeast Asia, held at the Centre for History and Economics, Magdalene College, Cambridge, on May 14 2011, with the support of the China Medical Board.

We are grateful to Carol Richards and Alastair Su for comments and additions.
Table of Contents

Regional and Transnational Perspectives ................................................................. 3

Country-specific Studies .............................................................................................. 10
  Burma / Myanmar ...................................................................................................... 10
  Cambodia .................................................................................................................. 12
  China ......................................................................................................................... 14
  Dutch East Indies / Indonesia .................................................................................. 18
  India ......................................................................................................................... 21
  Indochina / Vietnam ............................................................................................... 25
  Laos ........................................................................................................................... 27
  Malaya / Malaysia .................................................................................................... 28
  The Philippines ........................................................................................................ 31
  Sabah and Sarawak (Malaysian Borneo) ............................................................... 32
  Singapore ................................................................................................................ 34
  Thailand ................................................................................................................... 35

Themes ............................................................................................................................ 37
  Disease, Incidence and Prevention ......................................................................... 37
    • Cholera .................................................................................................................. 40
    • Leprosy .................................................................................................................. 41
    • Malaria .................................................................................................................. 42
    • Tuberculosis ......................................................................................................... 44
  Economic Crises ......................................................................................................... 45
  Education ................................................................................................................... 46
  Environment .............................................................................................................. 47
  Health Systems ......................................................................................................... 48
    • Health Policy ....................................................................................................... 48
    • Health Workers ................................................................................................... 49
  Illness and Health, Conceptions of ......................................................................... 51
  International Organisations ....................................................................................... 52
  Maternal, Infant and Child Health .......................................................................... 54
  Medicine ................................................................................................................... 58
  Mental Health ........................................................................................................... 60
  Migration .................................................................................................................... 61
  Mortality .................................................................................................................... 62
  Nationalism ............................................................................................................... 63
  Nutrition ..................................................................................................................... 64
  Rural Health ............................................................................................................... 64
  Science, Research and Medicine ............................................................................. 65
